## SOFT SKILLS

- Long Life Learning
- Critical Thinking
- Communication
- Collaboration
- Time Management
- Teamwork
- Problem-Solving
- Positive Thinking

## HARD SKILLS

- HTML
- CSS
- Javascript
- TypeScript
- ReactJS
- React Native
- Next.js
- Antd
- Tailwind
- Bootstrap
- Shadcn
- i18n
- Node.js
- ElysiaJS
- Socket.io
- Drizzle ORM
- Prisma
- PostgreSQL
- Firebase
- Python
- Swagger

# YONGSIN LIMWILAIKUL

## FRONT-END / FULL-STACK DEVELOPER

## ABOUT ME

### Oak (ESFJ-A) | Full-stack Developer enthusiast

I am Oak, a final-year student at King Mongkut's Institute of Technology Ladkrabang, I am currently a Front-end Developer with 6 months of internship experience using React.js, React Native, and TypeScript at a startup company. During my internship, I had the opportunity to work on real projects and received positive feedback from my colleagues.

## PROJECT

### TicTacTalk

Frontend, Backend | Tic Tac Toe Online with Chat | React, Socket.io, Firebase

- **Development:** advanced tic-tac-toe online website with three piece sizes. 1v1 and 2v2 modes, and real-time chat, scoreboard, login/logout system, profile picture upload feature.
- **Design:** Tailored the design to appeal to a teenage audience, with the initial concept focusing on connecting with strangers through tic-tac-toe and fostering conversations, similar to a virtual board game cafe.

### My-ERP (Developing)

Frontend, Backend | ERP & POS Web Application | React, TS, ElysiaJS

- **Development:** Developed a web application for inventory management for my family's store. Features include manual or Excel-based product and employee record entry, order recording to adjust inventory levels, and a login system with role-based access control to limit features based on user roles. The system is tailored to meet the store's specific needs, focusing only on features in regular use. Previously, the store managed its inventory with Google Sheets, which became insufficient as order volumes increased, prompting me to create this scalable solution.
- **Design:** Designed a user-friendly web application with a simple interface to ensure ease of use and quick adoption without requiring training.
- **Database:** Created the database schema, including an ER diagram, and developed the backend using ElysiaJS and Drizzle ORM, with PostgreSQL for data storage.

## WORK EXPERIENCES

### Front-end Developer Intern

Witsawa Corp. | 2 May 2024 - 31 October 2024

- Assisted in the Frontend development of a project designed for an Admin system to manage various types of data.
- Collaborated with other teams, including Backend and Designers, to ensure seamless integration.
- Regularly updated and refined the implementation to align with project requirements.
- Tested the performance and functionality of the code to ensure reliability and efficiency.

## EDUCATION

King Mongkut's Institute of Technology Ladkrabang 2021 - 2025

- Bachelor of Science Program in Information Technology
- Multimedia and Game Development Branch
